EXECUTIVE SUMMARY

Staff Front-End Engineer and Technical Delivery Lead with 9+ years architecting enterprise-scale web applications (React, Next.js, Angular 18, TypeScript) across Banking, Healthcare, and Finance, including a Fortune 50 US bank. Functioned as de facto Technical Lead for distributed US-India teams, owning sprint execution, PR gatekeeping, and release readiness — experience suited to GCC delivery leadership in India and fintech/digital-transformation roles in Dubai. Doctoral research in distributed, blockchain-based health-record architecture grounds a research-driven approach to system design and data integrity. Champions AI-augmented engineering (Cursor, Claude Code, Copilot) as a force multiplier for team velocity.

CORE COMPETENCIES & LEADERSHIP

Delivery & Offshore Leadership: 9+ years leading distributed US-India teams — sprint ownership, PR approval authority, release readiness

Technical & Research Leadership: Ph.D.-level systems research, delivery ownership, sprint grooming

AI-Augmented Engineering: Cursor, Claude Code, GitHub Copilot embedded into workflows to raise velocity and quality

Architecture & Performance: Web performance, scalable component design, ADA/WCAG 2.1 accessibility, micro-frontends

TECHNICAL SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), React JS, Next.js, Angular 18, Node.js, HTML5, SCSS/Tailwind

State, Data Viz & Testing: Redux, NgRx, RxJS, MobX, D3.js, Highcharts, AG-Grid, Jest, Cypress (E2E), Enzyme, Jasmine, Karma

Certifications: Salesforce JavaScript Developer I (Lightning Web Components); Certified Blockchain Expert™, Blockchain Council (Mar 2025)

PROFESSIONAL EXPERIENCE

Citigroup Inc. *Irving, TX, USA*

Senior Front-End Engineer (Technical Lead / Delivery Lead) Dec 2018 – Apr 2026

- Functioned as Technical Lead for a distributed team of 5-6 developers across US-India time zones, owning sprint execution, PR approval/merge authority, and release readiness for flagship products (CD-Renewal, Security Center, QR Login).
- Spearheaded front-end performance and strict ADA/WCAG 2.1 accessibility compliance (NVDA screen reader) for multi-million-user banking portals.
- Architected custom, high-performance interactive data visualization systems (D3.js, Highcharts), replacing legacy third-party components.
- Championed a TDD culture (80%+ UI test coverage) and drove Cypress E2E automation, cutting regression cycles by ~30%.
- Drove adoption of AI-assisted engineering (Cursor, Claude Code, Copilot), accelerating delivery velocity by ~25%.

Tech Stack: React, Next.js, Angular 18, Redux, RxJS, TypeScript, D3.js, Cypress, Jest, Jenkins.

PricewaterhouseCoopers (PwC) *Boston, MA, USA*

Software Application Developer Jun 2018 – Dec 2018

- Architected reusable, composable component libraries in React/Redux for PwC's core internal audit platform (iADAPT), accelerating module rollout across Risk Assessment and Reconciliation teams.

Tech Stack: React, Redux, JavaScript (ES6+), Bootstrap, Jest, Jenkins.

Siemens Healthineers *Norwood, MA, USA*

Software Engineer III Nov 2017 – Jun 2018

- Led UI redesign of the CIP healthcare platform (TypeScript, React, MobX), improving workflow efficiency for clinical users.

Tech Stack: React, TypeScript, MobX, Flux, Node.js, REST APIs.

EDUCATION

Ph.D. in Information Technology — University of the Cumberlands, KY, USA (2026) | Dissertation: Distributed, Blockchain-Based Personal Health Record (PHR) Systems

M.S. Computer Science — Governors State University, IL, USA (2017)

B.Tech. Computer Science — ICFAITech University, India (2014)
